DISSEMINATION

<u>Guidelines</u>: Use the tables below to explain your communication actions with regards to Dissemination. Add as many tables as you need accordingly to the number of WPs expected in your project. Please consider providing dissemination actions for each WP. Please give each table a progressive number and report the title of the WP.

Please add a comprehensive WP, named WP dissemination, to provide information about the dissemination activities that concern the entire project.

Consider that by "Dissemination" Ager means sharing research results with potential users - peers in the research field, industry, other commercial players, farmers and farmer associations, agronomists and technicians, policymakers. By sharing your research results with the rest of the scientific community, you are contributing to the progress of science in general. https://ec.europa.eu/research/participants/docs/h2020-funding-guide/grants/grant-management/dissemination-of-results en.htm).

WP dissemination

Aims (please explain	
what you mean to	
achieve with this action.	
What reaction or change	
is expected from the	
target audience?)	
Target (who is your	
preferred audience for	
this action? E.g. peers,	
farmers, agronomists	
policy makers, industries,	
etc.)	
Message (What do you	
intend to	
say/communicate with	
this action?)	
Tools (es. Website,	
newsletter, social	
network, academic	
papers, events,	
publications, conferences	
etc)	
Monitoring (please	
indicate here your key	
performance indicators	
together with the	
monitoring tools)	
Timeline (please explore	
here when, within the	
timeframe of the	
research project, you plan	
to realize this action)

COMMUNICATION

<u>Guidelines:</u> Use the table below to explain your communication actions with regards to Communication. Add as many tables as you need accordingly accordingly to the number of WPs expected in your project. Please consider providing communication actions for each WP. Please give each table a progressive number and report the title of the WP. Please add a comprehensive WP, named WP communication, to provide information about the communication activities that concern the entire project.

Consider that by "Communication" Ager means to inform, promote and communicate your activities and results to reach out society (including the media and the public). Communication, in fact, should be addressed to multiple audiences and goes beyond peers and the academic community. Within this umbrella we propose you two forms of communication: one-way communication or unidirectional way of communication and two-way communication or dialogue. One way communication does not require interaction or feedback. In case of two-way communication input, feedback and contributions are needed and the communication flow is open and goes from you to the audience and vice versa. Examples of one-way communication include: newspapers and magazines, press releases, newsletters, manuals, brochures, booklets, flyers, letters, radio, television, video, posters, stickers, banners, billboards, website, policy briefs (https://ec.europa.eu/research/participants/data/ref/h2020/other/gm/h2020-guide-comm en.pdf). Examples of two-way communication include: dialogues, face-to-face conversation, group discussions, conferences, brokerage events, school visits, tours, round tables, exhibitions, meetings, workshops, open days, demonstrations and prototypes, telephone calls, e-mail information service (question and answer), internet debate.

RESPONSIBLE RESEARCH AND INNOVATION (RRI)

According to the EU Commission "Responsible Research and Innovation (RRI) implies that societal actors (researchers, citizens, policy makers, business, third sector organisations, etc.) work together during the whole research and innovation process in order to better align both the process and its outcomes with the values, needs and expectations of society.

In practice, RRI is implemented as a package that includes multi-actor and public engagement in research and innovation, enabling easier access to scientific results, the take up of gender and ethics in the research and innovation content and process, and formal and informal science education

(https://ec.europa.eu/programmes/horizon2020/en/h2020-section/responsible-research-innovation).

Please in the following paragraphs describe how your research engages with RRI and more specifically issues of public engagement, gender, ethics, open access and science education.

Do not exceed 2500 characters (spaces excluded)
<u>CITIZEN SCIENCE</u>
Explore here if and how the concept of citizen science ¹ can be applied to your research project. In case citizen science does not apply to your project please explain here why you reached this
conclusion.
not exceed 2500 characters (spaces excluded)
not exceed 2500 characters (spaces excluded)

¹ According to the EU Commission Citizen Science spans a range of levels of engagement: from being better informed about science, to participating in the scientific process itself by observing, gathering or processing data. Citizen science is a broad term, covering that part of Open Science in which citizens can participate in the scientific research process in different possible ways: as observers, as funders, in identifying images or analysing data, or providing data themselves. This allows for the democratisation of science and is also linked to stakeholders' engagement and public participation. (https://ec.europa.eu/digital-single-market/en/citizen-science#:~:text=Citizen%20science%20is%20a%20broad,data%2C%20or%20providing%20data%20themselves).
